Jenna Mikus (QUT PhD candidate) will engage us in a discussion about what being "well" means to us, how comfortable we are with technology, and how we relate to our environment.

Dr Sara Branch (Griffith University) will teach us how we can use bottle-tops or buttons as an innovative tool to build relationships, open dialogue, and understand the shape of our community and our networks.

Just bring your collection of caps, tops or buttons, and be ready for a fascinating evening of shared stories about community before we celebrate the end of another year of interesting ideas and conversations.
